SEIKO SMART LABEL PRINTER

EFFECTIVE:

May 15th 2010

SLP OVERVIEW

The fastest and easiest way to print labels from your PC or Macintosh

When you just need to print one label at a time you don't need a general-purpose printer. You need a smart printer.

Printing just one label with a general-purpose printer can be a pain. You fuss with formatting, manually feed the label pages into your printer and then cross your fingers. If you're lucky everything is aligned correctly and your printer doesn't jam. Don't put up with that. Smart Label Printers® from Seiko Instruments make printing labels a breeze.

Smart Label Printers come with software that makes it easy to quickly customize your label. You can prepare labels to your liking by selecting fonts, importing graphics, and utilizing bar codes—all on the same label if you wish.

A SmartCapture software component allows you to instantly load addressing data from applications such as Word, Outlook, ACT!, GoldMine, Palm Desktop software or WordPerfect, so you won't have to waste time typing again.

HARDWARE FEATURES:

PRINTER FEATURES:

- Prints high quality labels, fast and silently.
- Direct thermal technology eliminates toner, ink or ribbon costs.
- Internal power supply works worldwide, eliminates bulky power brick.
- Small size fits anywhere.
- Connects to USB or Serial port for easy installation.
- Easy to share over a Windows network.

TECHNICAL SPECIFICATIONS

Print Method: Direct thermal
