Introducing the Label Printers that make business a pleasure

Offering the highest print speed and print resolution in their class, the PT-P900W and PT-P950NW are easy-to-use, offering durable laminated labels up to 36mm in width.

Key Features:

Easy-to-use professional label design software
Both models use the free P-touch Editor label design software that's ideal for both Windows and Mac operating systems. It boasts advanced features such as industry standard 1D and 2D barcodes, the importing of logos and other graphics, as well as the fonts installed on your computer. It also links to Microsoft Excel® spreadsheets or .csv files to rapidly print multiple labels.

Wired and wireless connecivity, including Bluetooth
These compact desktop label printers can be connected to your PC or Mac using the integrated USB or Wi-Fi connections. The PT-P950NW model can also connect to your wired network, and has an optional Bluetooth module that allows it to easily connect directly to tablets, portable PCs and to Bluetooth input devices such as barcode scanners.

Create and print labels from your smartphone or tablet
The Brother iPrint&Label app wirelessly connects to the printer to let you design and print labels from your device. That means you don't need to turn on your PC at all. Need to label electrical and datacom cabling and equipment? Simply use the Brother Cable Label Tool app to print labels perfect for wrapping around cables or for sticking to faceplates and electrical distribution boards.

Include label printing as part of your solution
Software and app developers can use various software development kits (SDK) for Microsoft Windows, iOS and Android devices to enable label printing from within your own software and apps. This makes these label printers ideal to integrate into custom solutions.

Flexibility and portability to print labels from anywhere
Find yourself on-site and without power? Whether you're on a construction site or simply need to print labels while on a portable trolley, this range has the answer. Simply attach the optional battery base and rechargeable lithium-ion battery pack to allow label printing wherever and whenever required.

Print labels on demand without a PC
Ideal for the food, healthcare and laboratory markets, the optional Touch Panel Display Unit (for PT-P950NW only) lets you print labels without a connection to a PC. Design your label(s) and upload to the required location(s) indicated on the buttons. Simply design, upload and press to print. It's that easy. Additionally, there's a built-in clock ideal for "Use By" or "Printed On" labels.
